

Your Chemistry Journey

Further & Higher Education

Studying Chemistry will open doors you may not have even thought of. You can continue your career in a science-related discipline, or you can use the skills you learn in a different field. Chemists are considered thinkers, who can work with large amounts of information to make the best, measured decisions. Some of the biggest names in history have been chemists: Marie Curie, Alfred Nobel and Robert Boyle - so you'll be in great company.

Careers

Careers in Chemistry are extremely varied. Chemistry is needed for Medicine and other medicalrelated degrees. Other career paths include: Medicinal Chemistry, Molecular Pharmacology, Physical Chemistry and Environmental Chemistry to name but a few.
