

Health and Social Care Cambridge Technical Year 12

Aims and Rationale: After completing a full bridging project introducing students to key concepts and skills, students engage in a comprehensive two week induction programme. The year 12 teaching is split across two expert teachers who each cover their own unit of work. Teaching is varied and empowers students to become skilled independent learners. Students are tested regularly and rigorously and they know from the outset of the course exactly when tests will take place and when coursework deadlines need to be met. The course is enriched through visits to settings and also visiting speakers. Students sit two full external exams at the end of year 12 so half the final qualification has already been undertaken by the end of this year.
